

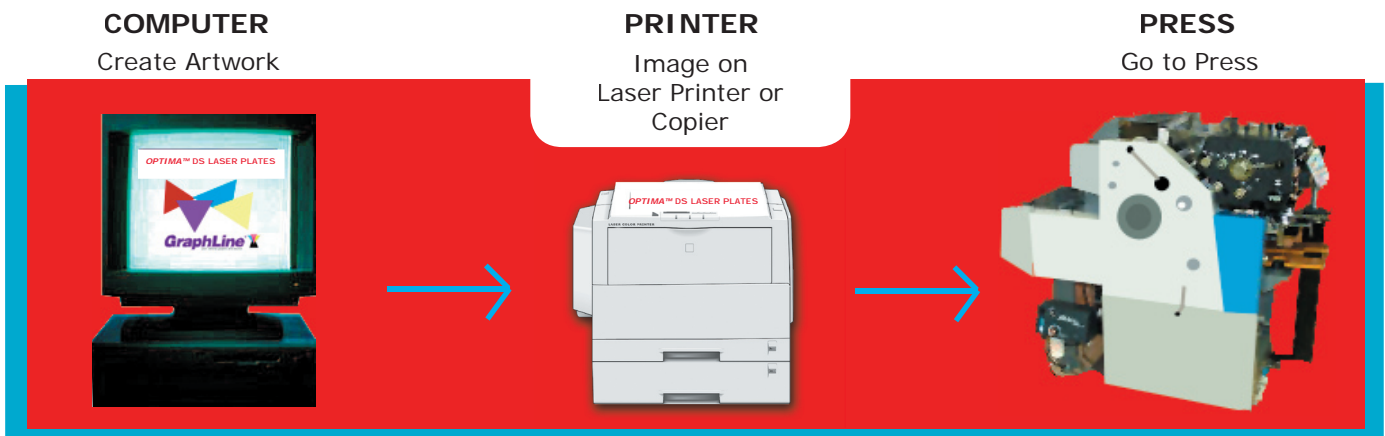

GraphLine[®] **Optima[™]** DS LASER PLATE

THE **OPTIMA[™]** DS LASER PROFIT MAKING PLATE

The **Optima[™]** DS Laser Plate is an economical *direct to laser plate* solution for producing economical plates for various printing applications. **Optima[™]** Laser Plates are engineered for printers seeking an alternative solution to e-stat plates and eliminating costs associated with metal plate processing. **Optima[™]** Laser Plates address simple printing applications requiring short runs (up to 10,000 impressions) or spot color reproduction. **Optima[™]** Laser Plates are coated on both sides and manufactured of durable polyester base material to eliminate excessive stretch.

OPTIMA[™] DS LASER PLATES ARE SIMPLY PROCESSED AS FOLLOWS:

OPTIMA[™] DS LASER PLATE FEATURES:

- Manufactured on dimensionally stable polyester base
 - Durable 2 sided matte coating
 - No special chemistry required
 - No darkroom needed
- Requires no films, stripping or chemical processing
 - Direct to press in minutes
 - Prints cleanly on press
- Will reproduce fine lines and halftones of 100+ lpi
 - Requires no additional heat
